

Satya Tarun

Frontend Mobile & Web Developer

📍 Hyderabad, IN 📞 +91 93919 54467 ✉ satyatarun.951@gmail.com
🌐 www.satyatarun.work 🐙 github.com/TarunK951 🔗 linkedin.com/in/satya-tarun-k

Frontend and mobile developer building cross-platform apps in React Native and Expo and web applications in React and Next.js, plus the dashboards and admin surfaces behind them. I design in Figma first, so the screens and the code come from the same head.

EXPERIENCE

Frontend Developer — Nyra AI

Oct 2025 — Aug 2026 · Hyderabad, Hybrid

- Built **Nyra Command Center**, the sales CRM: a nine-stage pipeline, three role types with scoped access, and fifteen-day sprint tracking — consolidated into one surface rather than four tools. Next.js 14 App Router, Supabase, PostgreSQL.
- Shipped **Nyra Tracking**, the React Native companion app reps use in the field — three navigation patterns, two platforms from one codebase, credentials in Expo SecureStore rather than plain storage, and a shared API client with the web app.
- Built the front end of the **NyraAI Platform**, an always-on healthcare assistant covering 20+ medical specialties across five metro cities, serving both patients and front-desk staff.

Frontend Developer — Atyuttama

Feb 2024 — Nov 2025 · Hyderabad, Hybrid

- Mobile application development: built and shipped cross-platform apps for iOS and Android from a single codebase, covering navigation, state, API integration and release builds.
- Worked hybrid with the product team across the full front-end surface — component architecture, responsive layout and the web work supporting each app.

Freelance Frontend & Mobile Developer — Independent

2025 — 2026 · Alongside full-time

- Designed and built ten client and product front ends end to end — Figma through to deployment on Vercel — across studio sites, education, e-commerce, community platforms and AI chat interfaces, several with a React Native app sharing the web product's design language.

SELECTED PROJECTS

- HeyRik** Conversational voice interface across 30+ languages, inbound and outbound, with a live demo agent running in the browser. Next.js, TypeScript, Tailwind CSS
- Subham Astro** App and web for one product, five reading types, one shared design system. Designed and built solo. React Native, Expo, React Navigation, Next.js, Figma
- GrowCircle** Two connected community apps, 100% TypeScript, built to a 60fps scroll target. Next.js, Redux Toolkit, GSAP, Lenis, Leaflet
- Husle Life** Storefront and admin across three product lines, with one bounded 3D accent rather than a 3D site. Next.js, Three.js, Tailwind CSS
- Vidaris Institute** An institute brought online — three pathways, two audiences, designed and built solo. React, Tailwind CSS, Figma
- CocoChat** Streaming AI transcript with two modes, auth-gated, no page reloads. Next.js, React

SKILLS

CORE	TypeScript, JavaScript (ES6+), HTML5, CSS3, responsive design, performance profiling
FRAMEWORKS	React, Next.js (App Router), React Native, Expo, Flutter, Tailwind CSS, React Navigation, TanStack Query, Redux Toolkit
DESIGN & TOOLS	Figma, design systems, GSAP, Motion, Three.js, Git, Vercel, Expo EAS

EDUCATION

B.Tech, Cyber Security — Malla Reddy Engineering College

Hyderabad
